

# JOHN BRADY

---

27881 La Paz Road. Suite G-159 • Laguna Niguel, CA 92677 • 949-842-1236 • John@BradyImaging.com

## OBJECTIVE

---

I desire a position as an instructor, in sales or technical support in the photography or imaging industry.

## SKILLS

---

### Photography:

**Studio Operations:** I have operated a photographic business of one type or another since 1972.

**Portraits & Weddings:** Most of my photography has involved *people* photography and I would describe myself a portrait photographer. I have photographed approximately 1500 weddings. I photographed schools and youth sports leagues.

**Commercial Photography:** I have photographed many products and provided commercial images for brochures, ads and annual reports.

**Lab Operations:** I am an experienced in printing both black & white and color images. I have printed custom images using enlargers and high volume printing using mini-labs and automated printers. I performed maintenance on the equipment and did oversee the quality of images produced by the studio.

**Digital Imaging:** I have been working with digital images since 1993. At that time, I would scan prints and use software to retouch and manipulate images. For the since 2002, I have worked almost exclusively with digital cameras. I have extensive experience in the use of Photoshop to manipulate, enhance and correct images. I can scan reflective art and film in almost any format.

### Instructor:

**Classroom:** Taught Business Management classes at Otero Junior College.

**Computers:** Provided individualized and classroom training on computer applications and software including MS Office, QuickBooks, Photoshop.

**Government:** Developed and presented Navy Counter/Antiterrorism Program on a worldwide basis. Presented training and briefings on various subjects. I was a Senior Instructor of Intelligence Subjects at 6" ITAAS. Developed a *Strategic Planning* workshop and text for NASA Headquarters.

**Photography:** Taught photo courses at Otero Junior College and intensive one-day workshops. I was a frequent speaker at camera clubs and judge for local and regional competitions.

### Computer Skills

**Database Development:** developed database applications for control of classified material, personnel security clearances, budget management and other applications using dBASE and DataEase query languages.

**Office Automation:** automated the security offices of Department of Transportation and NASA. This included development of needs requirements, procurement, installation and training. Acted as a consultant to small businesses in the installation, set-up and operation of automated systems.

**Desktop Publishing:** self-published several books and developed brochures, sales aids and ads for small business, including my own, providing camera ready art.

**Digital Imaging:** familiar with digital photography and the manipulation of photographic images with the use of several software packages including PhotoShop and Picture Publisher.

**Web Site Development:** Developed web sites for individuals and businesses.

**Training:** trained members of Department of Transportation and NASA security offices, my own employees, and others in the use of various software packages to make greater use of automated systems.

**Artificial Intelligence:** Developed a series of AI rules that allowed DOD to track major items of Soviet military equipment.

**Sales:** for almost 30 years I have operated small business where I made sales presentations to potential clients.

**Program and Project Management:** Developed and implemented a number of projects and programs while working for the US Government. Several of these were large-scale efforts:

Assisted in the writing of Deployment Plan for First Corps (200,000 plus people and 125 units) to Korea with individual responsibility for writing two major annexes.

Oversaw and coordinated the collection operations of 7 reserve units in 2 states in their support of national intelligence collection effort.

Development of plans for covert operations in support of national objectives.

**Contract Management:** Oversaw a number of service and guard contracts. Developed the *Statement of Work* for a number of contracts for the purchase of services and equipment. Evaluated responses to *Solicitation for Proposal* to select the contractor that would provide the best system for the project. Developed and implemented *Quality Control Plans* service contracts.

**Personnel Management/Supervisor:** I supervised subordinates in all my government employment as well as in my own businesses. At one point I supervised 8 professional employees, 4 clerks and 100 guards.

**Budgeting:** submitted budget requests and oversaw expenditures at all my government assignments. I developed software for the tracking of budget actions.

## **EXPERIENCE**

---
